Fig. a. Confocal images of tumour necrosis factor-receptor 1 (TNF-R1)-stained osteoblast-like SaOs-2 cells in control cells and cells treated with 100 ng/ml tumour necrosis factor-alpha (TNF- α) for 24 hours. No difference in the TNF-R1 immunoexpression was observed. Scale bars = 50 μ m. DAPI, 4',6-diamidino-2-phenylindole.
