

## HAWAII ACP

HAWAII 2 Page I

Section 2. Injury details	
Injury site	<ul> <li>Right</li> <li>Left</li> <li>Bilateral</li> </ul>
Anatomical location of injury	<ul> <li>Hand (injury distal to and including CMCJ)</li> <li>Wrist (injury proximal to CMCJ)</li> <li>Hand and wrist (injuries distal to and proximal to CMCJ)</li> </ul>
Injured structures (Choose all that apply)	
<ul> <li>Skin</li> <li>Tendon</li> <li>Nerve</li> <li>Artery</li> <li>Muscle</li> <li>Ligament</li> <li>Joint</li> <li>Bone</li> </ul>	
Injury type	<ul> <li>Open (full-thickness skin injury)</li> <li>Closed (skin intact)</li> </ul>
If open, injury contamination:	<ul> <li>Contaminated (all open, fresh, accidental wounds)</li> <li>Dirty (old traumatic wounds, environmental contamination)</li> </ul>
Section 3. Initial management	
Was first aid given during initial management?	<ul> <li>Yes</li> <li>No</li> <li>Unknown</li> </ul>
If yes, first aid details: (Choose all that apply.)	
<ul> <li>Wound irrigation</li> <li>Tetanus vaccine</li> <li>Protective sterile dressing</li> <li>Elevation</li> <li>Splint/cast</li> <li>Other</li> <li>Unknown</li> </ul>	
During initial management, were prophylactic antibiotics given?	<ul> <li>Yes</li> <li>No</li> <li>Unknown</li> </ul>
lf yes, give prophylactic antibiotics details:	<ul> <li>Co-amoxiclav</li> <li>Flucloxacillin</li> <li>Clindamycin</li> <li>Other</li> <li>Unknown</li> </ul>

Page 2

## (Give duration of antibiotic course in days)

Section 4. Hand trauma team management	
Was first aid performed by the hand trauma team during assessment?	<ul> <li>Yes</li> <li>No</li> <li>Unknown</li> </ul>
lf yes, provide details: (Choose all that apply.)	
<ul> <li>Wound irrigation</li> <li>Tetanus vaccine</li> <li>Protective sterile dressing</li> <li>Elevation</li> <li>Splint/cast</li> <li>Other</li> <li>Unknown</li> </ul>	
Were prophylactic antibiotics prescribed by the hand trauma team?	<ul> <li>Yes</li> <li>No</li> <li>Unknown</li> </ul>
If yes, which prophylactic antibiotic was prescribed:	<ul> <li>Co-amoxiclav</li> <li>Flucloxacillin</li> <li>Clindamycin</li> <li>Other</li> <li>Unknown</li> </ul>
Duration (days)	
	(Give duration of antibiotic course in days)
Has the patient been admitted to hospital following hand trauma team assessment?	<ul> <li>Admitted</li> <li>Discharged home, to come in for surgery at a later stage</li> </ul>
Section 5. Operative management	
Operation - number of hours since injury	
Grade of leading surgeon	<ul> <li>Consultant/Senior Surgeon</li> <li>Associate specialist</li> <li>Registrar</li> <li>Core surgical trainee/SHO</li> <li>Foundation doctor</li> <li>Advanced nurse practitioner</li> </ul>
Operating room setting:	<ul> <li>Main operating theatre</li> <li>Minor operating theatre</li> <li>Trauma clinic/Outpatient room</li> <li>Emergency department room</li> </ul>

Anaesthetic:	<ul> <li>General anaesthetia</li> <li>Local anaesthetia (including WALANT)</li> <li>Regional anaesthesia</li> <li>Other</li> </ul>
How was hair removed from the operative site?	<ul> <li>Clipper</li> <li>Shaving</li> <li>Hair was not removed</li> </ul>
Surgical preparation fluid:	<ul> <li>Alcoholic povidone-iodine</li> <li>Alcoholic chlorhexidine</li> <li>Aqueous povidone-iodine</li> <li>Aqueous chlorhexidine</li> <li>Other</li> </ul>
Sterile field preparation:	<ul> <li>Full sterile drape</li> <li>Aperture drape only</li> <li>None</li> <li>Other</li> </ul>
During scrubbing, was double gloving used?	<ul><li>○ Yes</li><li>○ No</li></ul>
Were antibiotics given at induction of anaesthesia?	<ul> <li>Yes</li> <li>No</li> <li>Unknown</li> </ul>
Antibiotic given at induction (select all that apply)	Co-amoxiclav Flucloxacillin Clindamycin Gentamicin Teicoplanin Other
Was wound washout performed?	
<ul> <li>Yes</li> <li>No</li> <li>Unknown</li> </ul>	
What type of washout was used?	<ul> <li>Sterile saline</li> <li>Aqueous povidone-iodine</li> <li>Antibiotic irrigation</li> <li>Other</li> </ul>
If other, please specify	
What volume of washout was performed?	<pre>   &lt; I Litre     I-3 Litres     &gt;3 Litres     Unknown </pre>

Type of operation (Choose all that apply.)	
<ul> <li>Wound debridement and washout</li> <li>Joint washout</li> <li>Repair of nerve(s)</li> <li>Repair of artery(s)</li> <li>Repair of tendon(s)</li> <li>Repair of muscle</li> <li>Repair of ligament(s)</li> <li>Repair of joint capsule/ volar plate</li> <li>Manipulation under anaesthesia</li> <li>Open reduction and internal fixation (ORIF) of fracture</li> <li>Open reduction and external fixation of fracture</li> <li>Open reduction and K-wire of fracture (buried)</li> <li>Open reduction and K-wire of fracture (exposed)</li> </ul>	
Were sutures used for repairing tendon, nerve, vessel or other structures?	<ul> <li>Yes</li> <li>No</li> <li>Unknown</li> </ul>
Was suture used antimicrobial or standard?	<ul> <li>Antimicrobial</li> <li>Standard</li> <li>Combination</li> </ul>
Was the suture absorbable/non-absorbable?	<ul> <li>Absorbable</li> <li>Non-absorbable</li> </ul>
Were sutures used for skin closure?	<ul> <li>○ Yes</li> <li>○ No</li> <li>○ Unknown</li> </ul>
Was suture used antimicrobial or standard?	<ul> <li>Antimicrobial</li> <li>Standard</li> <li>Combination</li> </ul>
Was the suture absorbable/non-absorbable?	<ul> <li>Absorbable</li> <li>Non-absorbable</li> </ul>
Postoperative Management	
Was a dressing applied?	<ul> <li>Yes</li> <li>No</li> <li>Unknown</li> </ul>
Which dressing type was applied?	<ul> <li>Standard non-adherent dressing</li> <li>Antimicrobial non-adherent dressing</li> <li>Other</li> </ul>
What was the name of the contact dressing applied?	
Was a paste applied with the dressing? (e.g. chloramphenicol, betadine paste)	<ul> <li>○ Yes</li> <li>○ No</li> <li>○ Unknown</li> </ul>

Was a splint applied?	⊖ Yes
vvas a spinie applied.	$\bigcirc$ No
What kind of splint was it?	Plaster of Paris cast
······································	Thermoplastic splint
	$\bigcirc$ Bulky bandage
	Zimmer splint
	Other
	Unknown
Was there postoperative elevation?	◯ Yes
1 1	○ No
	O Unknown
What type of elevation was it?	$\bigcirc$ High-arm sling / Bradford sling
	$\bigcirc$ Not specified
Were postoperative antibiotics prescribed?	⊖ Yes
vvere postoperative antibiotics prescribed:	<u> </u>
	No - already prescribed
	○ No - not indicated
What antibiotic was given?	○ Co-amoxiclav
0	🚫 Flucloxacillin
	O Clindamycin
	Gentamicin
	⊖ Teicoplanin
	Other
	Unknown
Duration of antibiotic (number of days)	
Posto portiva destination	Patient's usual place of residence
Postoperative destination	Patient's usual place of residence
	<ul> <li>Inpatient ward</li> <li>Other</li> </ul>
	Other
Please give details	
<u> </u>	
Followup plan	O Review by clinical team within I week
	Review by clinical team in 1-2 weeks
	Review by clinical team by more than 2 weeks
	$\bigcirc$ Referral to hand therapy for follow up and
	rehabilitation
	○ GP review in 1-2 weeks
	$\bigcirc$ No follow up required
	Other
Please give details	
Thease Sive details	

WHO GUIDELINES CHECKLIST:

In the sections below, please tick every recommendation in the WHO guidelines that you have completed for this patient.

Although many of these may not be relevant to most hand trauma cases, please tick those that you have used during this operation

For further information on the contents of checkboxes, see the attached table.

Preoperative measures	<ul> <li>SAP (surgical antibiotic prophylaxis) administered within 120 minutes before incision</li> <li>Pre-incision surgical site preparation with an antiseptic fluid based on chlorhexidine gluconate</li> <li>Surgical site hair shaving avoided immediately prior to incision</li> <li>Surgical hand preparation with an antiseptic fluid</li> </ul>
Perioperative / Intraoperative measures	<ul> <li>Perioperative discontinuation of immunosuppressive agents</li> <li>Perioperative oxygenation</li> <li>Maintaining normal body temperature</li> <li>Use of protocols for intensive perioperative blood glucose control</li> <li>Drapes and gowns</li> <li>Maintaining adequate circulating volume control/normovolemia</li> <li>Incisional wound irrigation</li> <li>Antimicrobial coated sutures</li> <li>Prophylactic negative pressure wound therapy</li> </ul>
Postoperative measures	<ul> <li>Discontinuation SAP (surgical antibiotic prophylaxis)</li> <li>Standard dressings</li> </ul>

## End of survey
